

I am enjoying 6.006!

Confidence with Prereqs

Prerequisites

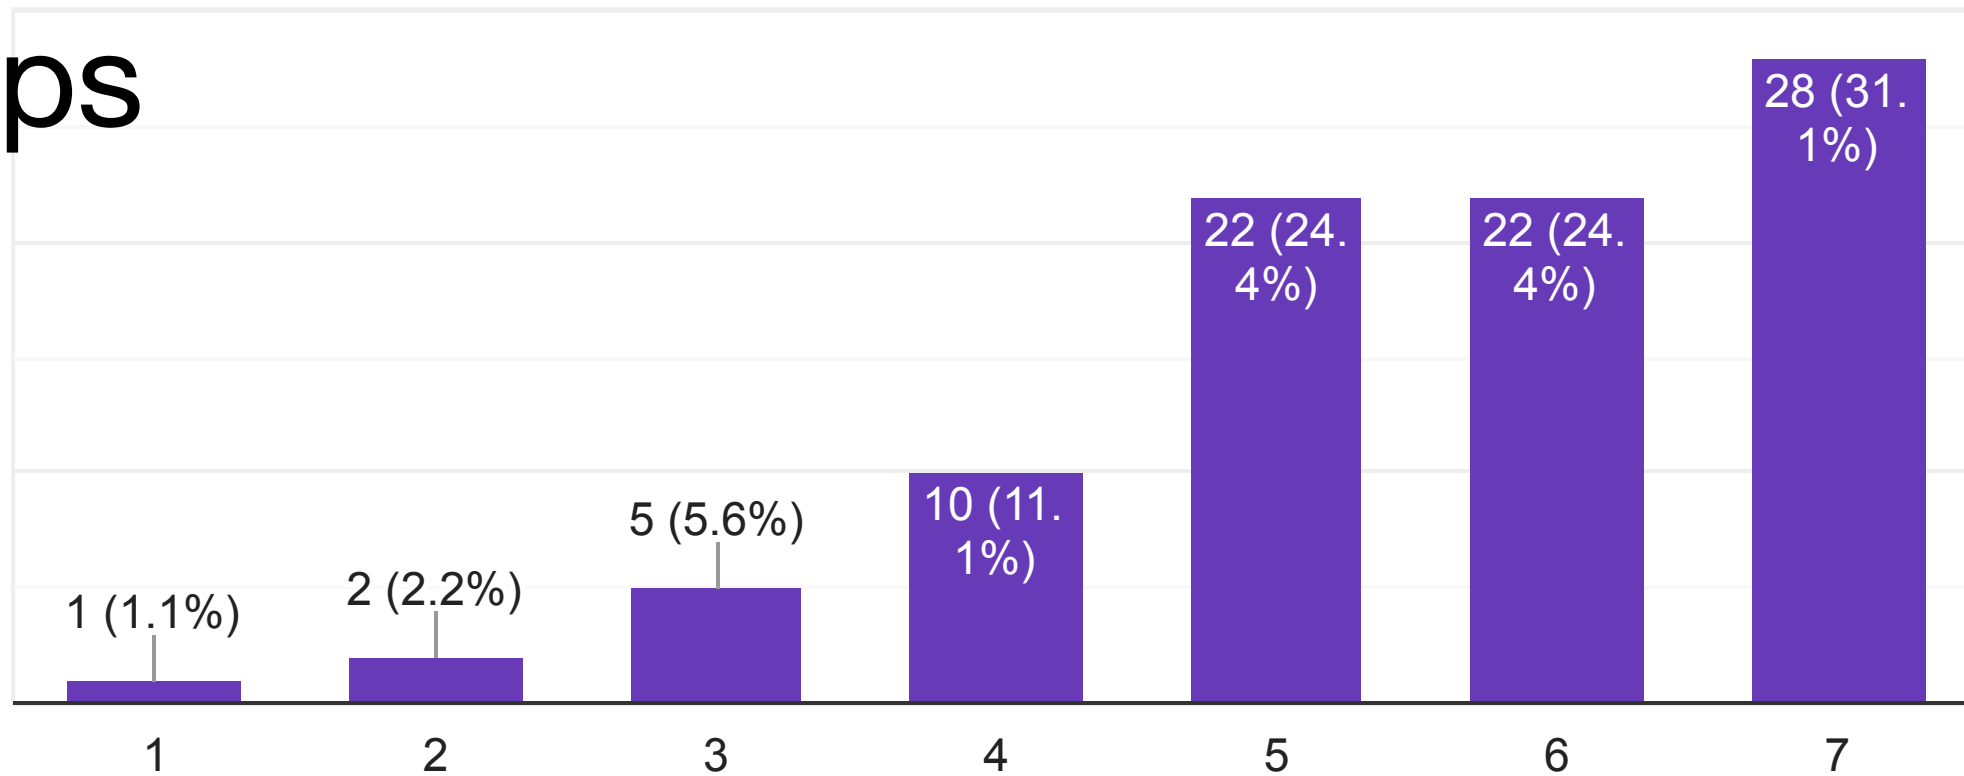

"Sometimes it feels like the lecturer is talking down to us (eg. shaming people for not having taken the **prereqs**)- please don't do this!"

We are **not** trying to shame anyone!

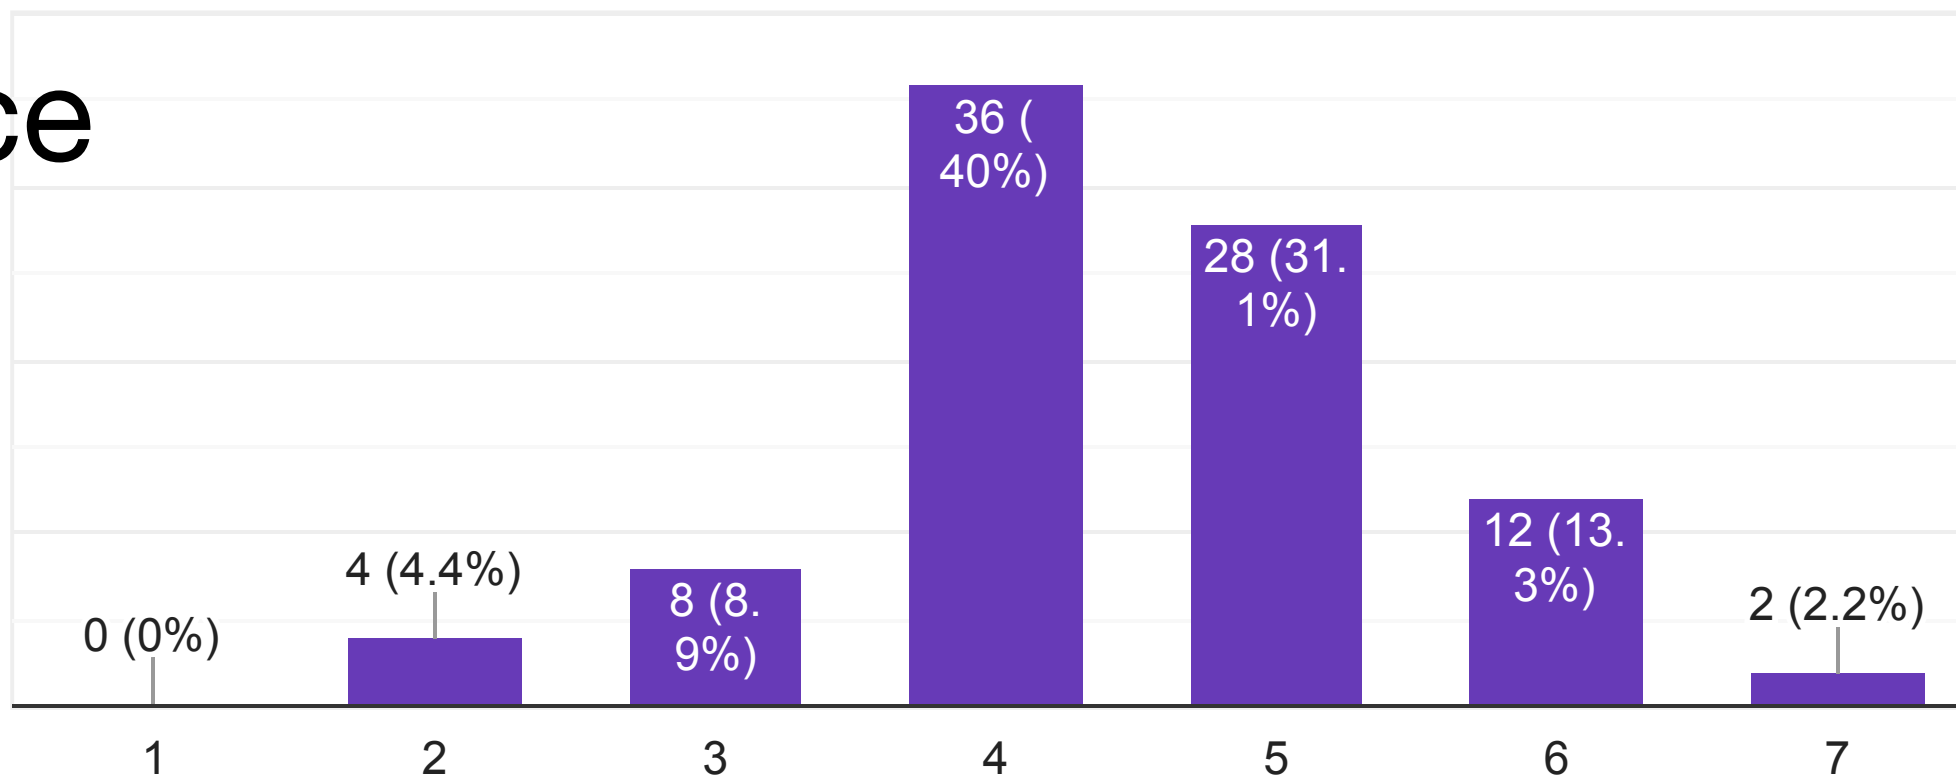

We reference things you should **already know** to **help you review** or know what to go back and study

Useful Content

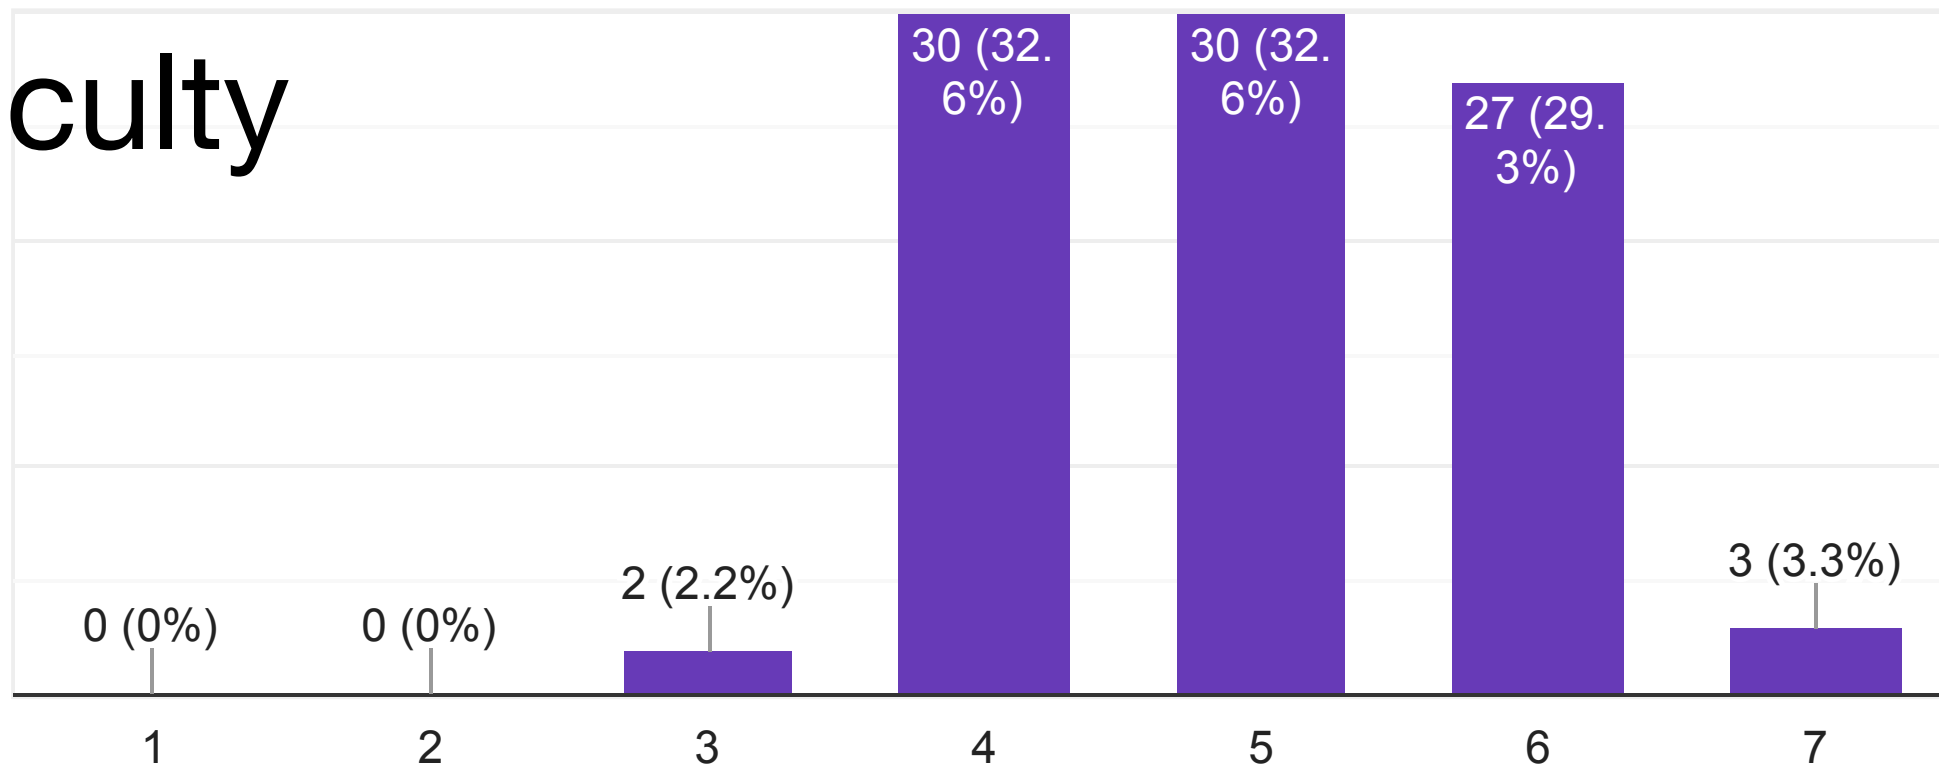

Problem Sets

Length

Difficulty

Problem Sets

"Can the PSETs be shorter? :)"

"Sometimes questions don't explain enough nuance, i.e. there are a lot of clarifications I have to ask."

"Sometimes it seems like we're just applying the same alg from lecture again and again, for all 6 problems"

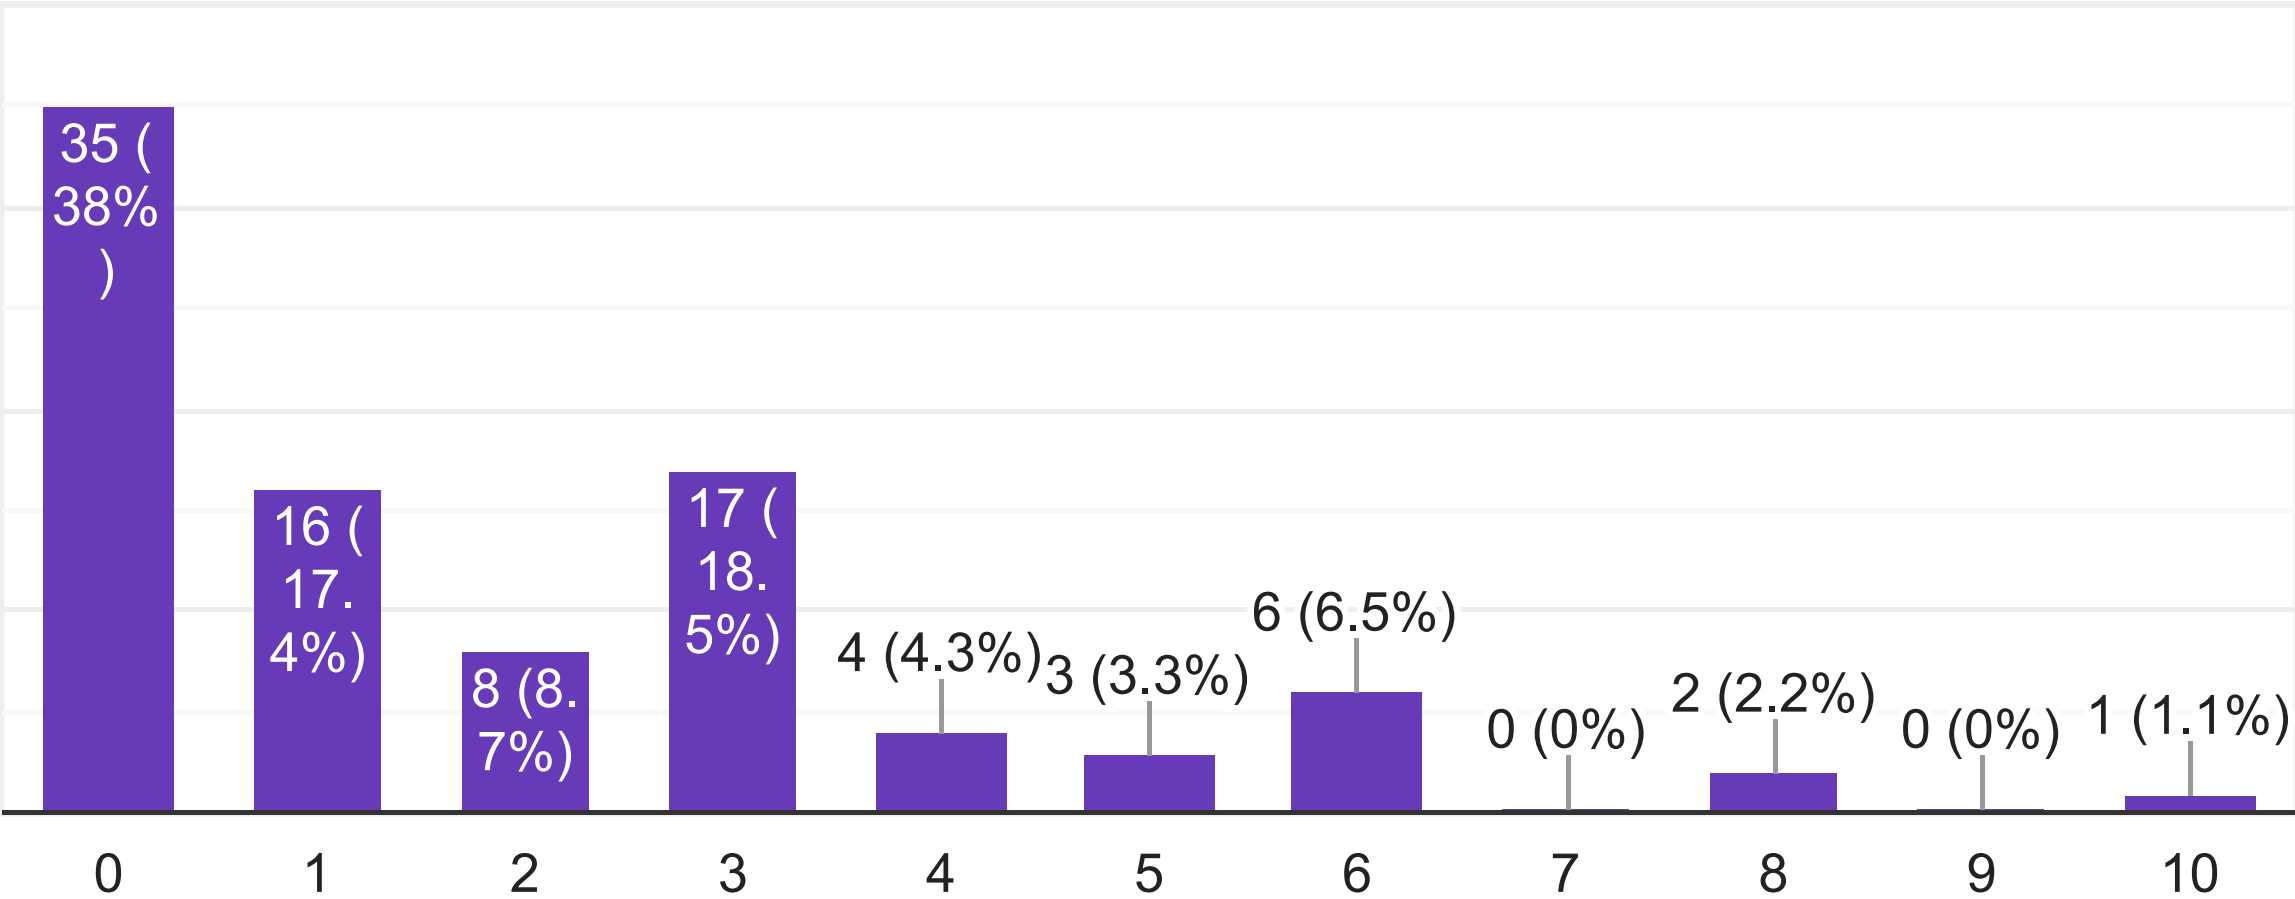

Problem Sets

"coding is very frustrating sometimes"

"Challenging but a good learning experience. I wouldn't want them to be easier, though, because I feel like these difficult problems allow me to think about the concepts more thoroughly than I would if the problems were easier. I love the character names, pop culture references."

Office Hours

Attendance

Office Hours

"they're usually very helpful, but when they're super packed and busy it becomes a waste of time"

"I've been there only once and there are just too many people..."

"I struggle to make office hours with athletics and other assignments."
